

The cylinder will be tall enough to not force someone to bend down to get to the the MP3 player

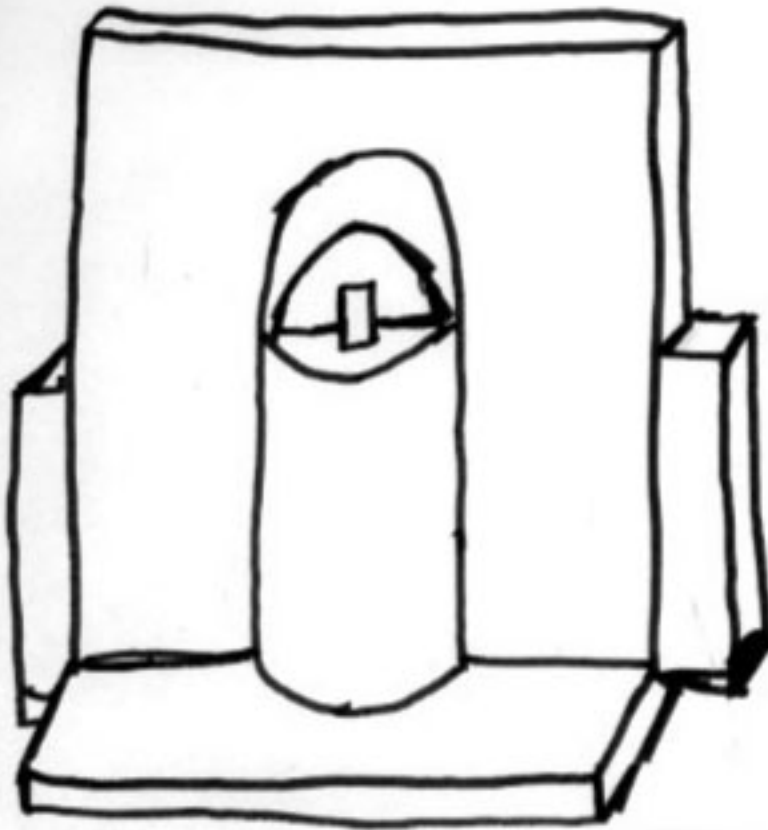

The display can fit simply in a side aisle, against a wall, or out in the lobby of the store. The background can be changed to fit the inner lighting of the store as well.

Each piece can be condensed down as needed, and removed if absolutely needed, but not recommended.

The speakers were taking away from the design so they were instead incorporated into the back panel.

The hood was taken out so that it would not shadow the MP3 player, and thus take away from what we are trying to sell.
